Skeie Quality

For generations, Skeie has been delivering high quality products to auditoriums around the world, directly to end users.

Main markets are the Nordic countries, Northern Europe, British Isles and North America.

Unique know-how, continuous product development, quality, ergonomics and design have made us a leading provider of fixed seating solutions.

Skeie Sustainability

Skeie quality means products that last for years, with minimal maintenance.

Particularly noteworthy is the aspect of the LCC - Life Cycle Cost. Our products are an investment; if you include the low follow-up costs and the long life of our cinema seats, the desired balance is achieved through sustainability. For you, your company and your company values, this is the more economically favourable option in the long term.

We believe that quality and sustainability will be even more important for our customers in the future.

Unlimited Fabrics

Skeie Seating offers a large selection from reputable partners, in all price ranges.

We can supply both natural fabrics such as wool and leather, synthetic fabrics as well as blended fabrics.

Norwegian happy sheep

Norwegian Wool

a sustainable choice

High Quality

Norwegian wool is of very high quality. Some of the benefits:

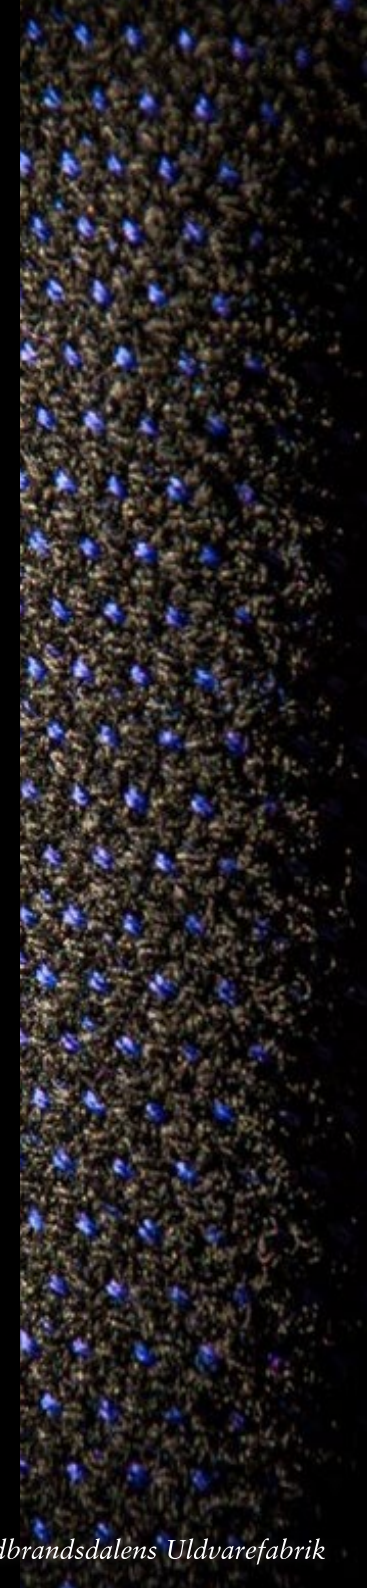

- 100% natural
- Self-cleaning and has antibacterial properties
- Elastic and holds well in shape
- Natural flame retardant
- Easy to clean and maintain
- Absorbs moisture
- Attracts little dust
- Noise-reducing fabrics

All Natural

Our cool climate means that the chemical treatment of the wool from the sheep is not relevant. The Norwegian sheep is grazing in outdoor areas where no kind of pesticides are used.

Sustainable

The products are environmentally certified with the European eco-label "EU-Ecolabel" (the "EU Flower") which corresponds to the Nordic "Svanemerket".

University of Stavanger, Norway

Skeie Accessories

Extensive range of accessories are available, such as cable channels, electrical sockets, USB sockets, induction charging, various types of table and many more.

A photograph of a large, empty concert hall. The view is from the audience's perspective, looking towards the stage. The seating is tiered and made of dark wood. The stage is a complex structure with multiple levels, including a large wooden platform in the center. The ceiling is high and features a complex network of metal beams and lighting rigs. The lighting is dim, with some spotlights illuminating the stage area.

*A few examples from
our extensive range
for auditorium...*

Symposium

One of our most successful chairs for the education sector. It is fully upholstered and optimized for long teaching days.

Artist

A great chair with Nordic design and extra seating comfort. The back is anatomically designed and the seat is well padded.

Drama

A classic chair with good seating comfort and an exclusive expression.

Akademi

A unique design with a lot of visible wood. The seat cushion is comfortable and it has a simplistic back cushion with built-in lumbar support.

Every style of seat
can be

Tailor Made

Wave

Our most exclusive design product,
with nominations and awards from
both the Norwegian Design and
Architecture Centre and the Red Dot
Design Award.

Logos

The Logos series consists of five different models - Basic, Mix, Classic, Maxi, Full, with various heights and table designs. All are optimized for use in teaching and conference buildings. It is highly adaptable, with an ergonomic design.

Logos-F

Logos that is fully upholstered and without visible wooden details.

Shown here is the riser-mounted type.

Logos Swivel Concept

Highly adjustable, can rotate left and right, also move back and forth. It automatically returns to the position when you leave the chair.

Fugleberg

Under Development

Full upholstered fixed seats that makes it possible to have an interactive class in blended learning.

Designed to make the room structured and tidy, easy to clean.

*New way of
learning*

Team

Under Development

Modular seats arrangement on a flat floor. Easy to move around to adapt to different needs, e.g. group room in the night and classroom during the day. Can accommodate small to large group (3-9 people). High optimization of space.

The image shows a modern, open-plan learning environment. It features rows of teal-colored armchairs with light wood accents, arranged around white rectangular tables. Each workstation is equipped with a black tablet or screen mounted on a white partition wall. The space is bright and clean, with a light-colored floor. The text 'Skeie | Fugleberg' is written in a large, white, serif font, and 'BLENDED LEARNING' is written in a smaller, white, sans-serif font below it. A semi-transparent vertical bar is on the left side of the image.

Skeie | Versatility

We can provide seating solutions for any type of room and style.

The maintenance-free tip-up function of our seats ensures optimal ergonomic solution and seating comfort.

Our folding chairs (Tip-Up) require minimal space while providing good seating comfort. This is an advantage for narrow row spacings.

Various table designs to serve different needs.

Skeie | Amphitheater

Skeie has a long history of building amphitheater solutions on behalf of our customers internationally.

Our experience is your safety.

There are several important factors:

- Step sound
- Stability
- Solid fastening for chairs
- Tensile force for the fitting of chairs
- Avoid rolling on the chairs
- Pressure chamber and ventilation
- Fire resistance

Quality pays off in the long run.
